# 24 August 2026

Weekly Information Bulletin — Reconstruction Phase  
Issued by: Plan Venezuela Renace ("Venezuela is Reborn")

|                             |                         |
|-----------------------------|-------------------------|
| Dead                        | 6.509                   |
| Rescued                     | 6.462                   |
| People treated in hospitals | 226.696                 |
| Homes handed over           | 335                     |
| Homes surveyed              | 60.785                  |
| Habitable                   | 35.545                  |
| Restricted use              | 14.239                  |
| High risk                   | 11.001                  |
| Debris removed              | 600.790,70 TON (28,61%) |

## Notes on the figures

- Figures are reproduced exactly as printed in the originals, including the Spanish number convention: a period is the thousands separator and a comma is the decimal point. So 5.546 means five thousand five hundred forty-six, and 10.964,97 T means 10,964.97 tonnes.
- The 4 July report was published on Telegram (it was not found on X) and the 8 July report in a video posted on X; both were added on 29 September 2026. No report has been found for 23 July.
- The 3 July sheet is issued by the Ministry of Popular Power for Communication and Information; from 4 July onward the header is that of the Government of the Bolivarian Republic of Venezuela.
- On 21 July the category “Personas sin vivienda” (people without housing) is renamed “Damnificados” (displaced / disaster-affected) and carries a different value — 17.265 against 17.907 the day before. It returns to 17.907 on 22 July. The 4 July report already uses “Damnificados” (16.309).
- Water distributed: the 6 and 7 July figures are printed as “8.130,036 L” and “8.322,853 L”. Given the surrounding series (669.008 L on 5 July, 12.126.298 L on 9 July), these are most likely 8,130,036 and 8,322,853 litres, with the comma a typographical error. The 8 July report (9.689.528 L) confirms this reading.
- Several series are not monotonic. “Patients treated” falls from 41.069 on 20 July to 39.567 on 21 July before rising again. “People in camps” and “Temporary camps” both fluctuate. “International rescue workers” declines steadily from 4.388 to 2.278, consistent with foreign teams withdrawing.
- “Rescued” (6.462) is unchanged from 3 July; “Buildings damaged” (856) and “Buildings collapsed” (190) from 4 July; “Injured” (16.740) from 5 July.
- The 3, 10, 17 and 24 August documents are not daily reports but weekly bulletins of the reconstruction phase, using a different set of categories.
- “People treated in hospitals” goes from 73.356 on 10 August to 86.358 on 17 August and then to 226.696 on 24 August — more than a doubling in a single week, against increases of roughly 13.000 in the week before. This suggests a change in what is being counted, or an error; it should not be read as a like-for-like weekly increase.
- “Homes handed over” stays at 335 between 17 and 24 August while homes surveyed and debris removed both keep rising.
- \* The 3 August bulletin distinguishes 43.679 homes evaluated from 41.624 homes with a status assigned (25.325 habitable, 9.866 restricted use, 6.433 high risk). Later bulletins give only the sum of the three statuses, which is the figure shown in the weekly table.
- The 3 August bulletin implies a debris target of about 2.1 million tonnes ( $346.755 \div 16,51\%$ ), the same as the 17 and 24 August bulletins; the 10 August bulletin implies 2.079 million.
